Causality and the Kramers Kronig relations

Causality describes the temporal relationship between cause and effect: A bell rings after you strike it, not before you strike it. This means that the function that describes the response of a bell to being struck must be zero until the time that the bell is struck. Consider a particle of mass moving in a viscous fluid. The differential equation that describes this system is,

Bibliography on Causation in Comparative Criminal

Law ...

"Causation in the criminal law and civil law paradigms. Although a very significant proportion of crimes are result-crimes as opposed to conduct-crimes, issues of causation tend to be less prominent in the criminal law paradigm than in the civil law paradigm. This is a reflection of the fact that whereas the civil law paradigm is as much concerned with the effects of conduct on victims as with

Causation Models in Twin Studies

for Assessing Causality The Logic of Experimentation: 1. Take individuals drawn at random from a population If you have selected (ascertained) samples some of the logic may not be sound and you may (probably will) have bias parameter estimates. Convenience samples (such as undergrads) are not inherently problematic, but they may impede generalizability 2. Randomly assign them to one of
