Data Mining is the process of extracting patterns from data. Two general avenues of research in the intersecting

areas of agents and data mining can be distinguished.
Agents and Data Mining Interaction: 4th International

...

Agent mining, namely the interaction and integration of multi-agent and data mining, has emerged as a very promising research area. While many mutual issues exist in both multi-agent and data mining areas, most of them can be described in terms of or

Agents and Data Mining Interaction - CS - Huji - mafladoc.com

A challenge in agent and data mining interaction (ADMI) is the interaction itself: whether agent enhances the data mining process, or data mining is used to improve agent intelligence [1]. Given the current pace of research progression from these two fields, introducing an entirely new mechanism would face the issues in terms of acceptance and adoption by the ADMI community. At first, let us
