Argumentation in Multi-Agent Systems (ArgMAS) Argumentation can be abstractly defined as the interaction of different arguments for and against some conclusion. Over the last few years, argumentation has been gaining increasing importance in multi-agent systems, mainly as a vehicle for facilitating "rational interaction" (i.e., interaction).

INTRODUCTION Multiagent systems are distributed systems. Strategic Argumentation in Multi-Agent Systems argumentation in multi-agent systems [20]. Within the latter field of research, issues related to strategic aspects of argumentation have gained some interest and constitute an active sub-field. Strategic argumentation takes place in multi-agent systems where agents aim to reach a common understanding for decision-making or try to persuade other agents of some opinion. Consider the following

Argumentation Schemes in Multi-agent Systems: A Social ...

Our view of argumentation schemes in multi-agent system specifications is flexible to allow agents to decide, in an autonomous way, whether to violate or not the norms, in particular norms about respecting the proposed uses of the argument schemes for their interaction. This is an important characteristic, considering the great challenge to manage communication in
