The general treatment of problems connected with the causal conditioning of phenomena has traditionally been the domain of philosophy, but when one examines the relationships taking place in the various fields, the study of such conditionings belongs to the empirical sciences. Sociology is no

[The sociology of correlation and causation | Climate Etc.](#)

Juxtaposing causation with correlation tends to limit the bounds of the causation discussion. With that limitation in mind, one of the components David Hume gave of what is referred to as causation is constant conjunction. That is, two events that happen together. Temporal precedence of events is also a condition contributing to the idea of causality.

[Causality in Social Work Research and Practice](#). Lewis (1975) argues that causal inference is an essential part of social work practice as well as social work research.

However, the association between causality and causal inference in the field of social work and logical positivism and critical rationalism with its emphasis on universal laws has subjected the search for causal linkages to

[Everyday Sociology Blog: Types of Causality](#)

In my last post, I wrote of basic ideas about causality.

Sociologists most readily assume that one thing in the social world causes another when the cause correlates with the effect, occurs before it, and there's a plausible, non-spurious causal mechanism. In this post, I develop the idea of
