(PDF) Closed-loop control of blood glucose level in type-1 ...

Some theoretical analysis of the control of blood glucose level in diabetic individuals is undertaken using a simple mathematical model of the dynamics of glucose and insulin interaction in the

Closed Loop Systems: Future Treatment for Diabetes ...

Closed loop means the system monitors blood glucose levels, uses an algorithm to determine if insulin is needed or not needed, or if glucagon is needed or not needed, and then gives the dose directly to the patient. A closed loop system requires no action on the patient's part, everything is done automatically by the device. Again, closed loop is just another term for an artificial pancreas

Closed-Loop Control of Blood Glucose, Book by Frederick ...

Closed-Loop Control of Blood Glucose Level in Type-1 ...

Closed-Loop Control of Blood Glucose Level in Type-1 Diabetes: A Simulation Study Selim Soylu 1, Kenan Danman ¹, brahim Ethem Sa u2, Mustafa Al 1,

Bi-hormonal Closed-Loop Blood Glucose Control for Type 1 ...

Automated control of blood glucose (BG) has been a goal of type 1 diabetes (T1DM) therapy. The normal pancreas

uses insulin and glucagon to regulate BG. Therefore, we developed a closed-loop BG control system utilizing both insulin and glucagon.

Artificial pancreas system improves blood sugar control ...

Using a closed-loop artificial pancreas system leads to improved blood glucose control and reduced hypoglycemia (low blood sugar), new research shows. The findings from the study, funded by JDRF, have been presented at this year's European Association for the Study of Diabetes (EASD) conference in Berlin, Germany.
