[ICT4D: A Computer Science Perspective |](#)

[SpringerLink](#)

A computer science perspective is complementary to that agenda. The computer science perspective focuses on exploring the resources, or inputs, of a particular context and on basing the design of a technical intervention on the available resources, so that the output makes a difference in the development context. The modus operandi of computer science, construction, interacts with evaluation

[Map of Computer Science](#)

Computer science is the subject that studies what computers can do and investigates the best ways you can solve the problems of the world with them. It is a huge

field overlapping pure mathematics.

A vision for computer science the system perspective
in Computer Science lags far behind these needs. With a few exceptions [1,2,12, 13], the importance of system design. With a few exceptions [1,2,12, 13], the importance of system design is seldom recognized as a priority in research agendas and roadmaps.

Computer science - Wikipedia

Computer science is the study of processes that interact with data and that can be represented as data in the form of programs. It enables the use of algorithms to manipulate, store, and communicate digital information.
