[Conceptual model - Wikipedia](#)

A metaphysical model is a type of conceptual model which is distinguished from other conceptual models by its proposed scope: In economics, a model is a theoretical construct that represents economic processes by a set of variables and a set of logical and/or quantitative relationships between them. The economic model is a simplified framework designed to illustrate complex processes

Boris Wyssusek Queensland University of Technology

b.wyssusek@qut.edu.au Abstract. Failures in information

systems development have frequently been attributed to

the application of insufficient or faulty information

systems development methods. Some of these methods

are concerned with the creation of conceptual models,

which are used for
