Abstract: We consider the constrained finite and infinite time optimal control problem for the class of discrete-time linear hybrid systems. When a linear performance index is used the finite and infinite time optimal solution is a piecewise affine state feedback control law.

In this chapter we study the solution to optimal control problems for discrete time linear hybrid systems. First, we show that the closed form of the state feedback solution to finite time optimal control based on quadratic or linear norms performance criteria is a time-varying piecewise affine state feedback control law.
