1 Introduction Kazakov, Kutasov and Kostov [1] propose a matrix model dual to the Sine-Liouville theory, which in turn is conjectured to be equivalent to the 2-D string theory admitting black hole

A complete BPHZ version of the supersymmetry and broken ...

It is shown, using BPHZ renormalization techniques, that the Wess and Zumino supersymmetric scalar model can be renormalized such that supersymmetry and broken chiral invariance are preserved.

(PDF) Using reduce in supersymmetry - researchgate.net

This book is a self-contained introduction to the subject of supersymmetry. The algebras of supersymmetry and the R-symmetry generators are explained using a simple field theory model.

N = 2 supersymmetric ...

N = 2 Supersymmetric Ward Identities and Renormalized BRS and Anti-BRS Operators in Harmonic Superspace T. Lhlabi j Received February 28, 1989 The quantization of N=2 supersymmetric Yang-Mills theory coupled to a Fayet-Sohnius hypermultiplet is performed in the harmonic superspace, by requiring BRS and anti-BRS invariances. The corresponding Ward identities and the renormalized BRS and anti

Currents and anomalies in topological Yang-Mills theory ...

The quantum properties of topological Yang-Mills theory are investigated in the light of the N = 2 supersymmetry observed in flat space. We construct a unique system of covariantly (partially) conserved currents which develop anomalies while preserving BRS invariance of the theory.
