RedundancyMaster RedundancyMaster has the ability to configure multiple OPC servers into redundant pairs, thus increasing the OPC data's availability and reliability.

CAN bus - Wikipedia

A Controller Area Network (CAN bus) is a robust vehicle bus standard designed to allow microcontrollers and devices to communicate with each other in applications without a host computer.

OAuth 2.0 OAuth

OAuth 2.0 is the industry-standard protocol for authorization. OAuth 2.0 supersedes the work done on the original OAuth protocol created in 2006. OAuth 2.0 focuses on client developer simplicity while providing specific authorization flows for web applications, desktop applications, mobile phones, and living room devices. This specification and its extensions are being developed within the
