Magnetism and the Sun: Magnetism on the Sun

Combining our understanding of the basic features of magnetism, specifically magnetic fields, magnetic force, and the storage of energy in magnetic fields, we can now focus on magnetism particular to the Sun.

Sun - Wikipedia

The Sun is the star at the center of the Solar System. It is a nearly perfect sphere of hot plasma, with internal convective motion that generates a magnetic field via a dynamo process. It is by far the most important source of energy for life on Earth.
